Project Portfolio: Jeayoung Jeon

MLOps/DevOps and AI Engineer (Updated at 2024-12-08)

NOTE

My name is Jeayoung Jeon [전제영], and I'm an MLOps engineer in Seoul, South Korea. I also specialize in:

- 🐳 Developing **MLOps (APIs, Pipelines)** and **AI/LLM Platforms** in cloud-native environments.
- 👷 Building **Hybrid Kubernetes Clusters** for **High Availability** and **GPU Cost Reduction**.
- 🏆 Contributing decisions for **MLOps/DevOps** using backgrounds in **ML, Computer Vision, Automotive**.

I'm always open to new challenges and opportunities for various fields including **ICT**, **AI**, and **Automotives**. Please feel free to contact me. If you're looking for my brief resume and works, please see my **resume** (https://jyje.live/profile/resume) and **portfolio** (https://jyje.live/works) .

Work 💼

Mar 2024 – Nov 2024 (9 Months)

👷 **Intermediate Software Engineer [책임연구원] at MAXST** (https://maxst.com/ENG/main)

Roles: Lead MLOps/DevOps Engineer at Technology Division, MAXST

- MLOps Developing ML APIs, data pipelines, and AI Platforms for research team using open sources.
- LLMOps Building chatbots using self-hosted RAG+LLM systems for internal documents.
- SRE Site reliability engineering for web services. Service reliability engineering for ML workloads.

Jan 2021 – Feb 2024 (3 Years and 2 Months)

👨‍💼 **Software Engineer [선임연구원] at MAXST** (https://maxst.com/ENG/main)

Roles: Associate Researcher and DevOps Engineer at Technology Division, MAXST

- Algorithm Research Reviewing computer vision algorithms in state-of-art papers and implementing prototypes
- Hybrid Clusters Building hybrid clusters with AWS EKS and on-premise Kubernetes for digital twin project
- DevOps Building on-premise clusters and data pipelines for company's inbound/outbound projects

Mar 2012 – Aug 2020 (8 Years and 6 Months)

👨‍🎓 **Graduate Student Researcher in Computer Vision at POSTECH** (https://eee.postech.ac.kr/)

Roles: Ph.D Integrated Student at Department of Electrical Engineering, POSTECH

- Computer Vision Research on hyperparameters for accurate and efficient computer vision algorithms
- Automotives Principal computer vision technologies for autonomous driving including ADAS and SLAM; Participated in the development of the Korean government's ADAS research projects
- FPGA Efficiently implemented computer vision and machine learning algorithms with real-time parallel matrix processing; SoC-type GPU/NPU accelerator

Projects 💼

Jan 2024 – Oct 2024 (10 Months)

👷 **Widearth: Digital Twin & AR Content Platform at Widearth, MAXST** (https://widearth.world)

Roles: Lead ML/Infra Roles ~ MLOps/DevOps + ML Backend + SRE [contrib 75%]

- DevOps & SRE IaC, GitOps, CI/CD Pipelines, Monitoring, Logging, Notifications, Multi-Deployment, Emergency Response
- Hybrid Clusters Public Cloud + On-Premise Kubernetes, API Gateway Pattern, Dynamic VMs, GPU Cost Optimization
- ML Workloads ML APIs, ML Pipelines, Data Lakes, Dockerizing, Model CI/CD

Results: Service Launch ~ Small Team, Full Features, More Availability, Less Cost

- Launch Launched/Operated a platform as **1 infra engineer** with 15 people, 8 developers in 10 months.
- Low Cost Reduced cloud costs by **15M KRW (70%)** by using hybrid clusters for **300+ maps**.
- Robust Infra Achieved **96% availability/year and 14d downtime** using hybrid clusters and damage control.

Skills: Skill Stack for Project Widearth

AWS EKS Kubespray Python/FastAPI Argo Workflows Argo CD Bitbucket Pipelines Karpenter

Jan 2024 – Jun 2024 (6 Months)

🥇 **MLOps: On-Premise MLOps with Open Source Projects at MAXST** (https://maxst.com/ENG/main)

Roles: Lead MLOps Engineer ~ Planning + VoC + PoC + ML Workloads/Infra + Operation [contrib 90%]

- Kubeflow Integrated Argo Workflows; AutoML, Distributed Training, Model Registry; 16 GPUs Acceleration
- JupyterHub Integrated JupyterHub with IDE; Remote GPU Notebook, 4 GPUs Acceleration
- VectorDB Milvus, ChromaDB, RAG+LLM Chatbot
- ML Infra Setup CI/CD, NAS, Data Lake, Image Registry for ML Workloads

Results: Improved research environment and resource management ~ Increased availability and capacity by merging resources and automating management.

- Improved Env. Consolidated servers managed by researchers into k8s to stable infra capacity and stability; Decision-making using PoC.
- AI Platform Expanded from VoC of 2 researchers, gradually increased users to 10. Resolved technical debt through continuous MLOps upgrades.
- GPU Utilization GPU usage increased by **3 times** and successfully commercialized as a result of performing over **800** AutoML experiments

Skills: Skill Stack for On-Premise MLOps

Kubeflow Katib Training Operator Model Registry JupyterHub Argo Workflows Milvus ChromaDB Ollama Open WebUI Grafana Stack TensorBoard

Dec 2022 – Dec 2023 (13 Months)

👷 **DevOps: Hybrid Clusters for Internal/External Projects at MAXST** (https://maxst.com/ENG/main)

Roles: DevOps Engineer ~ Hybrid Clusters + CI/CD + Chatbot + Data Pipelines [contrib 50%]

- Hybrid Clusters Public Cloud, On-Premise Kubernetes, Multi-Cluster, API Gateway, IaC, GPU Operator
- CI/CD Public CI Platform, On-Premise Custom CI, GitOps CD, ChatOps for Results/Issues
- Pipelines Data Pipelines for ML Research, Production Pipelines for ML Inference

Results: Hybrid Cluster Initiation ~ Increased On-Premise Resource Utilization + Reduced Public Resource Costs + DevOps Culture Propagation

- Cost Reduction Maintained public availability while reducing costs by **50%** compared to pure cloud infrastructure using on-premises cost-effectiveness.
- Resource Utilization Utilized **90% of idle on-premises resources**, provided multi-cluster for prototyping in other departments
- DevOps Culture Introduced cloud-native development environment. Propagated DevOps culture including app modernization and CI/CD. Decision support through monitoring.

Skills: Skill Stack for DevOps and Hybrid Cluster

Kubernetes AWS EKS IaC Ansible Terraform CI/CD Bitbucket Pipeline Runners Argo CD Argo Workflows Python/FastAPI Python/Bolt (Slack)

Jan 2021 – Dec 2022 (2 years)

👷 **Computer Vision Engineer at MAXST** (https://maxst.com/ENG/main)

Roles: Associate Researcher ~ Algorithm research for digital twin systems and prototyping [contrib 50%]

- [Digital Twins] Digital twin system implementation using algorithms for converting perspective and 360 images to 3D space.

- [AR/XR] Camera calibration and AR/XR prototype development for various smart glasses

- [Automation] Development of automated pipelines for data acquisition and analysis

- [Military Service] Engaged in position related to graduate school majors and performed alternative military service.

Results: Development of computer vision algorithms and construction of digital twin systems

- [**Digital Twins**] Research and development of Visual-SLAM and ICP algorithms for digital twin systems

- [**Automation**] Development of automated pipelines for data acquisition and analysis

Skills: Skill Stack for computer vision research

[Computer Vision] [Visual-SLAM] [SfM] [ICP] [Python] [OpenCV] [.NET/C#] [Unity]

Jan 2012 – Aug 2020 (8 Years)

🏆 **Computer Vision and ADAS Researcher (Integrated Program) at POSTECH** (https://eee.postech.ac.kr/)

Roles: Graduate Student Researcher ~ Computer Vision and ADAS Research [full-time]

- [2018-2020] *Computing and Control Engineering Lab. (Prof. SH, Han)*

  Digital Twins and Simultaneous Localization and Mapping (SLAM) Research

  ○ Visual-SLAM Research using Multiple Cameras for Autonomous Driving

  ○ Prototyping of Digital Twins for ADAS and SLAM

  ○ Virtual Visual-SLAM for Real-World Environments

- [2012-2018] *Advanced Signal Processing Lab. (Prod. H, Jeong)*

  Advanced Driver Assistance Systems (ADAS) and Edge Computer Vision Research

  ○ High-Performance, Efficient FPGA Implementation of ADAS

  ○ High-Speed Algorithm Development for Traffic Signs and Road Terrain Detection

  ○ Research on Stereo Vision Algorithm for 3D Depth Estimation

  ○ Stereo Vision-based Online Calibration for Vehicle Cameras

  ○ Optimization Algorithm Research for Computer Vision using Cost Aggregation Table

Results: Proejcts and Research Papers ~ Studying on Automotive Simulations in Virtual Environments and ADAS On-Edge.

- [**Digital Twins**] Virtual Visual-SLAM for Real-World Environments

- [**Edge ADAS**] Research of ADAS including Traffic Sign Detection & Lane Terrain Detection with FPGA

Skills: Skill Stack for Computer Vision and ADAS Research

[Computer Vision] [Digital Signal Processing] [Automotives] [Autonomous Driving] [Advanced Driver Assistance Systems (ADAS)]
[Finite Programmable Gate Array (FPGA)] [Traffic Sign Detection] [Lane Terrain Detection] [MATLAB/Simulink] [C/C++]

Skills ⚒

NOTE

Here are my skills and highlighted items are industry-ready.

MLOps & LLMOps :

Ollama | OpenAI API | RAG | AutoRAG | Kubeflow | AutoML Katib | Training Operator | JupyterHub | Data Pipelines

DevOps & SRE :

Kubernetes | On-Premise | AWS EKS | GCP GKE | Hybrid Clusters | ARM64 | IaC | Kubespray | Terraform | Ansible | Istio | Grafana Stack | Karpenter

CI/CD/CT/CT :

Argo Projects | Bitbucket Pipelines | GitHub Actions | Self-Hosted Runner | Kaniko | Buildah | Locust | Litmus

ML Backend :

Python/FastAPI | Ollama | Milvus | PostgreSQL | Redis

Computer Vision :

Automotives | SLAM | PyTorch | OpenCV | FPGA

UI/UX :

Slackbot | Python/FastUI | .NET/MAUI | .NET/WPF | Unity

FinOps & BizOps :

Kubecost | Continuous BI

Programming languages :

Python | .NET/C# | C/C++ | MATLAB

Education 🏛

Mar 2012 – Aug 2020

🎓 **Master's Degree (Integrated Program) in Department of Electrical Engineering, Signal Processing & Computer Vision from Pohang University of Science and Technology (POSTECH) with GPA of 3.2/4.3**

- Thesis: Virtual Visual-SLAM for Real-World Environments, 2020

Mar 2008 – Feb 2012

🎓 **Bachelor's Degree in School of Electronic Engineering, Electronic Communication from Kumoh National Institute of Technology (kit) with GPA of 4.3/4.5**

- Thesis: A Study on a Visible Light Communication using LED in Under-water Environment, 2011

Awards 🏆

May 2014

🥇 **Altera Design Contest 2014, Excellence Prize from Intel-Altera Korea**

[System] FPGA, Vision-Based Driver Support Navigation System

May 2014

🥇 **Best Poster Session in Workshop from KYUTECH-POSTECH Joint Workshop**

[Poster] Iterative Polygon Detection using Harris Corner Space Method for Finding Traffic Signs

May 2013

🥈 **Altera Design Contest 2013, 2nd Prize from Intel-Altera Korea**

[System] FPGA, Vision-Based Traffic Sign Recognition System

Feb 2012

🥇 **Highest Honors in Undergraduate School from Kumoh National Institute of Technology**

[Summa Cum Laude] Highest Honors in Undergraduate Electronic Engineering School

Jan 2012

🥇 **NAVER Power KiN 2011** (https://m.site.naver.com/1y6qP) **from NAVER**

[Activity] Knowledge Export in `Electronics Engineering, Mathematics and Programming fields`. Active 2009-2011, Selected as a MVP in 2012 / Total number of answers 723, Selection ratio 98.1%
